Mallory Marine Outboard Pistons

Our outboard pistons are treated with a special MLS-2 piston skirt coating. The MLS-2 skirt coating is a dry film lubricant that retains oil while reducing friction and heat and aids in proper break-in. The coating will also reduce scuffing, results in less blow-by, increased horsepower, increased efficiency, and reduced wear on the cylinder walls and piston rings. MLS-2 provides invaluable secondary lubrication that greatly extends the piston life and provides superior corrosion resistance.

Piston Rings

A major OEM piston ring manufacturer manufactures our Outboard Piston Rings to the highest quality standards. They also fit OEM pistons and most other die cast after market pistons.

A representative picture from each series of pistons is displayed for identification purposes. Each of these are available in various oversize and port/starboard options.

Mallory Marine Oil Seals

Mallory Marine Oil Seals are specially designed and engineered from the highest quality materials for the marine environment. All oil seals are not the same, ours are constructed from special rubber compounds such as viton, buna, and other rubber materials designed for a specific applications. The outer cases are constructed from carbon steel or a marine grade stainless steel for applications exposed to the environment.

The dimensional chart below is intended for reference only and not to determine if a seal is suitable for a particular application.

Remanufactured Carburetors

The Marine environment is brutal on carburetors, new fuel formulations take their toll on gasket materials and floats. Extended "out of use periods or winter storage" cause formation of gum and varnish, and water or even small amounts of moisture in the fuel can cause severe internal corrosion. Some time this all amounts to damage that just can't be cured by a traditional carburetor repair kit. Mallory Marine remanufactured carburetors are the answer. Remanufactured not "rebuilt" to the original OEM specifications to assure proper performance.

Features:

- 100% flow tested on the production line throughout the entire operating range to assure proper fuel flow
- All "New" gaskets and "soft' components
- Body and bases are pressed and vacuum checked to assure proper gasket sealing surfaces
- New throttle shaft bushings are installed in every base
- High quality paint used on carburetor body for "new" appearance
- Anodized linkages for corrosion resistance

4-BARREL TBI SPARK FUEL MANAGEMENT SYSTEM

With the implementation of electronic fuel injectors in the automotive industry, many vehicles with carburetors or inadequate TBI systems lack the power, fuel economy or drivability to provide dependable service and performance. To improve on these inadequacies, ACCEL/DFI now has a Throttle Body Injection (TBI) Spark Fuel Management System for systems that operate in closed loop for optimum mileage, while reaping the benefits of this impressive 4 Bbl, 750 CFM throttle body. Precalibrated for a 350 cid engine, up to 300 hp, it can be calibrated for other applications with the CalMap calibration software. For ignition control, in addition to fuel control, an HEI Computer controlled distributor is recommended (non-computer controlled HEI distributor can also be used for fuel only applications). For convenience, this aluminum throttle body will bolt to a standard 4-bolt standard 4150 series carburetor flange manifold. System includes: ECM, Harness, Throttle body assembly, Air Cleaner, Fuel Pump, Fuel Filter, Sensors, Linkage Hardware.

Design-matched for use with 70, 110, and 140 Series Mallory Comp Pumps are CNC machined billet aluminum, with 3/8" NPT thread size, this compact design fits where others cannot making it easy to install and adjust for maximum performance. Maximum inlet pressure of 20 PSI, with a recommend maximum flow of 200 GPH.

Mechanical Fuel Pumps

These mechanical fuel pumps meet OEM & U.S.C.G. specifications. Manufactured by the Leading OEM manufacturers these fuel pumps are designed specifically for marine use. We give you two easy ways to insure proper identification, through our detailed application chart when you know the specific application or the clock position identification chart when you have limited application information.

Marine Fuel Pump Identification

Many fuel pumps are often used for multiple applications. Sometimes the model or engine displacement of an engine can be difficult to determine. If the pump original pump is available, it can be identified by checking the clock positions of the inlet, outlet and separator (if applicable). To properly identify these positions hold the pump with the lever facing away from you at the 12 o'clock position. Then looking at the bottom of the pump, note the clock position of the inlet and outlet (see diagram below). If you find a match you must also check the pump lever to make sure it is correct. You may also check the cross reference chart if the pump has an identifiable number stamped on the pump flange. Always review the application data for each pump to confirm proper application.

Aluminum Valve Covers

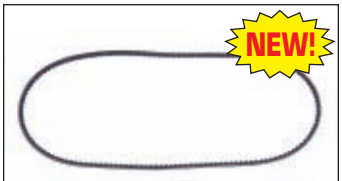

Mallory Marine's aluminum valve covers are precision die-cast for light weight and a perfect fit. Beautifully polished to a high luster, they are sure to enhance the appearance of any engine compartment. They feature an extended sealing lip to positively locate and secure the gasket and stop it from moving under pressure to eliminate oil leaks. The valve cover tops are a full .125" thick so they can be custom milled or engraved. These valve covers include a 1-1/4" diameter breather hole and are packaged two per set.

Shift Cables

Mallory Marine intermediate shift cables for Mercruiser Alpha and Bravo drives have been engineered to exceed the highest standards in the marine industry. We start with standards established by the ABYC, SAE and ASTM for the basis of our designs and specifications. We then specify the highest quality materials available, utilize state of the art equipment and manufacturing processes, and incorporate stringent quality control measures to produce these high performance cables.

The result is a smooth, reliable cable that will enhance the overall feel and operation of the stern drive shifting mechanisms.

Features:

Benefits:

- Stringent Tolerances and In-process quality controls for I.D. & O.D. dimensions reduce backlash and lost motion
- Swaged Armored core provides extremely smooth inner core surface, excellent column strength, exceptional flexibility, for a long lasting durability even in tighter routing condition
- Consistent Reliability and Performance in every cable
- All other components are manufactured from engineering grade thermoplastics, brass, and marine grade stainless steel for maximum corrosion protection and excellent UV resistance

Mallory Marine Oil Seals

Mallory Marine Oil Seals are specially designed and engineered from the highest quality materials for the marine environment. All oil seals are not the same, ours are constructed from special rubber compounds such as viton, buna, and other rubber materials designed for a specific applications. The outer cases are constructed from carbon steel or a marine grade stainless steel for applications exposed to the environment.

The dimensional chart below is intended for reference only and not to determine if a seal is suitable for a particular application.

MALLORY MARINE O-RINGS

Mallory Marine O-Rings are engineered and manufactured from the highest quality materials for the marine environment. All O-rings are not the same, ours are constructed from special rubber compounds such as silicone, viton, buna, and other rubber materials designed for a specific applications.

The dimensional chart below is intended for reference only and not to determine if an O-ring is suitable for a particular application.

Limited Warranty Policy

Mallory Marine, a division of Prestolite Performance

Mallory Marine hereby warrants to the original retail purchaser, subject to the limitations and conditions incorporated herein, that ***Mallory Marine*** Products are free from defects in material and workmanship for a period of two (2) years from the original retail purchase.

To obtain warranty service for a claim without labor, return the ***Mallory Marine*** product along with proof of the date of the original retail purchase, freight prepaid to the distributor from whom the product was purchased, the distributor will then forward the product to ***Mallory Marine*** for evaluation. If the product is determined by ***Mallory Marine*** to be eligible for warranty, ***Mallory Marine*** will credit the distributor and the Distributor will credit the selling dealer.

Product properly installed by a Qualified Dealer and determined by ***Mallory Marine*** to be defective, may be eligible for labor reimbursement. If the claim for warranty is determined by ***Mallory Marine*** to be valid ***Mallory Marine*** will advise the dealer of the extent of ***Mallory Marine's*** responsibility. ***Mallory Marine*** will settle all labor claims directly with the dealer. Credit for the defective parts and parts related to the warranty repair only, will be issued to the distributor. The distributor will then issue credit to the dealer.

To obtain warranty service for a claim with labor, return the allegedly defective ***Mallory Marine*** product and any other related damaged parts, along with proof of the date of the original retail purchase, freight prepaid to: ***Mallory Marine***, 10601 Memphis Ave., Cleveland, OH 44144.

The duties and obligations of ***Mallory Marine*** under this Limited Warranty are expressly limited to the repair or replacement (at the sole discretion of ***Mallory Marine***) of ***Mallory Marine*** products, which, in the sole opinion of ***Mallory Marine***, have been found to be covered under the terms and conditions of this Limited Warranty. ***Mallory Marine*** expressly disclaims any duty or obligation to repair or replace any product other than a ***Mallory Marine*** product.

This Limited Warranty shall become void if it is determined by ***Mallory Marine***, in its sole discretion, that products submitted for warranty consideration failed due to normal wear, or show evidence of abuse, lack of proper maintenance, improper installation, misapplication, alteration in any way whatsoever from their original design or negligence in use. ***Mallory Marine*** reserves the right to extend only the fair market value on claims that cannot be rectified due to unavailability of replacements parts.

Mallory Marine expressly retains the right to make changes and improvements in any product that it manufactures and sells at any time, without notice and without any obligation to change the catalogs or printed matter. ***Mallory Marine*** retains the right to determine, in its sole discretion, whether or not any ***Mallory Marine*** product is covered by this Limited Warranty.

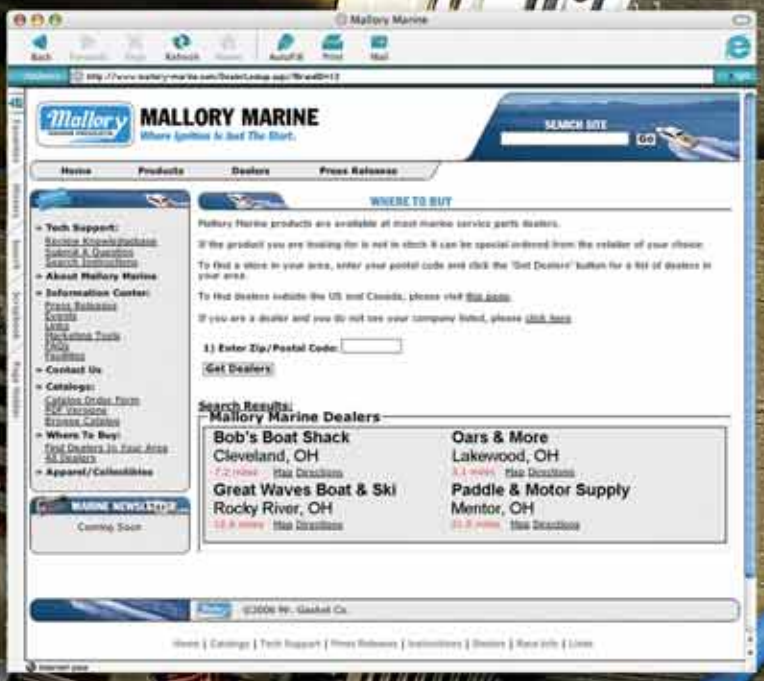

This Warranty is limited and expressly limits any implied warranty to two (2) years from the date of the original retail purchase on all ***Mallory Marine*** products and is nontransferable. Some states or countries do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

No person, party or corporate entity other than ***Mallory Marine*** shall have the right to determine whether or not this Limited Warranty is applicable to any ***Mallory Marine*** product or to authorize any action whatsoever on behalf of ***Mallory Marine*** under the terms and conditions of this Limited Warranty. This Limited Warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

This Limited Warranty is in lieu of, and expressly excludes, any and all other warranties, express or implied, including any warranty of merchantability or of a fitness for a particular application or purpose.
